**Fully Successful, Failed, or Barely Failed? The
Fate of Jets Trying to Break Through Their
Stellar Progenitors**

Dr. Raffaella Margutti / New York University
Host: Dr. Valerie Connaughton (USRA)

Recent observations are painting a complex picture of stellar explosions. In this talk, I review how data obtained across the electromagnetic spectrum are helping us constrain the presence and properties of jets and central engines powering the explosion of Super-Luminous SNe, Gamma-Ray Bursts, and ordinary SNe.
